

CYBELEC DNC 60 G Controller
 Sequence repeat, sub-programs and chain-programming, 75 x 130 mm Black-White LCD graphic screen (visible area), 240 x 128 pixel automatic contrast adjustment, 16 input (24 or 32 optional), Easy cut page.

Standard

GENERAL SPECIFICATION

ERMAK CNCHVR angle adjustable hydraulic guillotine shears are strong and easy to use machines which are able to cut any type of sheet with the best quality and speed.

Machines could be programmed easily with the use of dialog programs on CYBELEC control units. When the type, thickness and length of the sheet is entered to the controller, machine calculates and adjusts blade gap adjustment, backgauge distance, cutting length and cutting angle automatically.

Cutting angle adjustment is done automatically according to sheet thickness, so during cutting thin sheets, the shortest stroke is used.

DAC-360 Controller (Standart)

Compact and complete control for shearing machines. The DAC-360 provides a complete solution for shearing machines. In addition to the X axis position it offers automatic control of cutting angle, stroke length and gap. The numerical programming is user-friendly and guides the operator through the programming possibilities.

- Panel based housing
- Bright LCD screen
- Backgauge control
- Retract function
- Cutting angle control
- Cutting gap control
- Stroke length limitation
- Force control
- Manual movement of axes

CYBELEC DNC 60G Controller

- Automatic calculation of blade gap, cutting angle and stroke depth according to programmed material and thickness,
- 5 pre-programmed material type,
- Stroke depth management by frequency distortion or potentiometer,
- Automatic back gauge re-adjustment according to the blade gap,
- Sequence repeat, sub-programs and chain-programming,
- Multi-processor designed using ASIC and SMD. This provides full entegration and high safety,
- Keyboard with ergonomic buttons,
- 75 x 130 mm Black-White LCD graphic screen (visible area), 240 x 128 pixel automatic contrast adjustment,
- Internal SRAM memory,
- FLASH memory, updating with RS232 as an optional. 2 x RS232 port (Optional),
- High speed (250 KHz) N2X axis with PID regulator and programmable resolution,
- Inch/mm, TON/TONS conversion,
- 16 input (24 or 32 optional),
- 16 output (24 or 32 optional),
- Easy cut page.
- Flying cut
- On CNCHVR, blade gap adjustment, stroke adjustment and back gauge position is automatically adjusted from the DNC controller unit according to the sheet thickness. (Standard)

COLLAPSIBLE FRONT COVER

For safety reasons, front side of the hold downs is closed with a protection cover and upon customers' request, 1 m. part on the left side of this cover could be opened. With the help of this system, angled or drawn line cuttings could be done easily and controllably.

THROAT

With the help of 350 mm throat depth on standard models, it is possible to cut longer sheets than the standard cutting length, thus avoiding extra workmanship costs due to the longer sheets. Throat depth can be designed up to 500 mm upon request.

LASER CUTTING LINE

With the help of laser cutting line, angled or drawn line cuttings could be done easily and controllably. (Optional)

PNEUMATIC SYSTEM

Pneumatic sheet support system that provides the user an easy method of working, is an optional function to protect hanging of sheets down and to improve cutting precision during cutting of long and thin sheets.

STANDARD EQUIPMENTS

- Mono block, welded steel frame rigid to deflection moment and high tensile with ST44 A1 material.
- Fast and powerful back gauge with 1000mm distance, moving by ballscrewed shafts , with automatic swing away feature,
- Avoiding sheet sliding during cutting action, powerful hold downs with maximum performance,
- Roller bearings on the table to help placing sheets to machine easily,
- CYBELEC DNC 61 G cut Controller,
- Honed hydraulic cylinders and chrome coated pistons,
- High quality top and bottom blades,
Bottom : 4
Top : 2 cutting sides
- Hydraulic operated blade gap and angle adjusting system with CNC control,
- Bosch – Rexroth hydraulic system,
- High pressurized silent ATOS pump,
- Front support arms with ruler and flip-stop,
- Foot pedal available for single or continuous cutting,
- Cutting line illumination and shadow line,
- 350 mm throat depth,
- Side and rear guards,
- Automatic serial cutting, flying cut,
- Cnc controlled automatic angle adjustment stroke adjustment, hydraulic blade gap adjustment.

OPTIONAL EQUIPMENTS

- Pneumatic sheet support system,
- Angular front gauge,
- 500 mm throat depth,
- Oil coolant,
- Laser cutting line,
- Finger protective light curtain, (Category 4)
- Longer front arms or squaring arm,
- Automatic stacking system,
- Dynamic backgauge with acservo motors,
- X1, X2 backgauge for the angular cutting,
- Stainless steel cutter
